BLUEBOT XPRO

ROBOTIC Vacuum cleaner & Mop

Features and Specifications

Features and Specifications

- Blaupunkt Bluebot XPRO a powerful robot vacuum cleaner (1800 Pa) complete with mopping function accessory with electric flow control
- Works via remote control and robot panel
- Systematic cleaning with ZigZag and edge cleaning
- Selection of several cleaning modes and Turbo function (enables a significantly higher suction power)
- Easy to operate with the Quick Start button
- The slim design (7.6 cm) of the XPRO allows efficient cleaning under low furniture and beds
- Equipped with collision and distance sensors
- With the supplied magnetic strip you can define NoGo areas
- Equipped with a Brushless BLDC motor for longer life time, stronger suction power and quiet vacuuming
- The bottom of XPRO is equipped with fall sensors that detect heights on stairs. The Blaupunkt robot turns at this point
- Rotating combi-brush is ideal for animal hair, hard floors and carpet
- The charging station enables the automatic cleaning function "charge and continue" when a cleaning schedule is set
- Rotating side brushes - ideal for cleaning edges and corners
- With a noise level of 55-65dB the robot is quieter than a normal vacuum cleaner
- The double filter system combines a primary filter with a HEPA filter and enables the Bluebot XPRO to fight allergies
